WHY INVEST IN GR.V

Great Atlantic RESOURCES CORP. TSX.V: GR

Tier-1 Mining Jurisdiction
Golden Promise flagship property located in central Newfoundland, Canada, a top 10 mining jurisdiction worldwide with a pro-development government

Highly Experienced Management Team
Led by a team with a proven track record in resource discovery and development in the region

Gold & Critical Mineral Prices
Gold and critical mineral prices continue to be at a record high, driven by strong global demand. Driven by global electrification, AI, defense, supply deficits

Project Generation Model
Holds a diversified asset portfolio of over 64,000 acres of 16 critical mineral projects in Atlantic Canada, reducing shareholder dilution through partner funded exploration

LOCATED IN THE HOTTEST EMERGING GOLD BELT IN NORTH AMERICA

NEWFOUNDLAND CANADA

COMPANY OVERVIEW

Chris Anderson
PRESIDENT & CEO

David Martin
VP EXPLORATION

Great Atlantic Resources Corp (TSX.v: GR | FSE: PH02) is a Canadian exploration company focused on the development of mineral assets in the resource-rich and sovereign risk-free realm of Atlantic Canada. GR is building long-term shareholder value through the advancement of its flagship Golden Promise Gold Project in Newfoundland, supported by an existing NI 43-101 gold resource, high-grade drill intercepts, and a portfolio of critical mineral assets in a tier-one mining jurisdiction.

GOLDEN PROMISE PROJECT

FLAGSHIP PROPERTY

NEWFOUNDLAND | GOLD | 40,834 ACRES

- Multiple gold bearing quartz veins and vein systems, including zones of gold bearing quartz float
- 119,900 oz inferred resource at 10.4 g/t gold (Dec 2018 43-101)
- Approx. 5,000 m HQ drilling (Jaclyn and Otter Brook Zones)
- Historic 2010 bulk sample 2,200 tonnes (5.59 g/t gold calculated head grade report)
- Reported historic assays of quartz boulders up to 353.4 g/t gold
- 2021 drill results (Jaclyn Zone):238 g/t gold over 0.40m; 75.5 g/t gold over 0.35m; and 30.6 g/t gold over 0.41m (core length)
- 2021 maiden drill program (Otter Brook Zone): 4.95 g/t gold over 0.50m (core length)
- 2024 drill program (Jaclyn Zone): 120.9 g/t gold over 0.44m; 60.2 g/t gold over 0.44m; 42.7 g/t gold over 0.72m (core lengths)
- Objective to build a multi-million ounce gold resource

Milestones & Upcoming Catalysts

Golden Promise

- Conduct further confirmatory drilling to improve resource confidence at Jaclyn Main Zone
- Conduct drilling at Jaclyn North Zone to define a gold resource and test along projected trend to east – northeast
- Bulk sampling updates
- Assay results updates

Keymet Silver

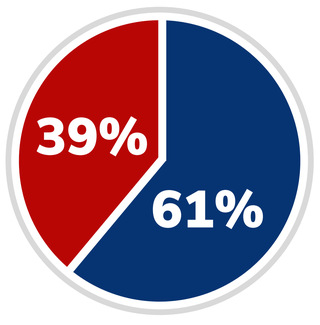
- Geochemical sampling, geophysical surveys and regional prospecting
- Submit permits for 2500m of diamond drilling and trenching program
- Test for additional polymetallic veins

Regional Targets

- Ground follow up and target reviews
- Generate new anomalies in select regions
- Further exposure to current and prospective project opportunities in portfolio

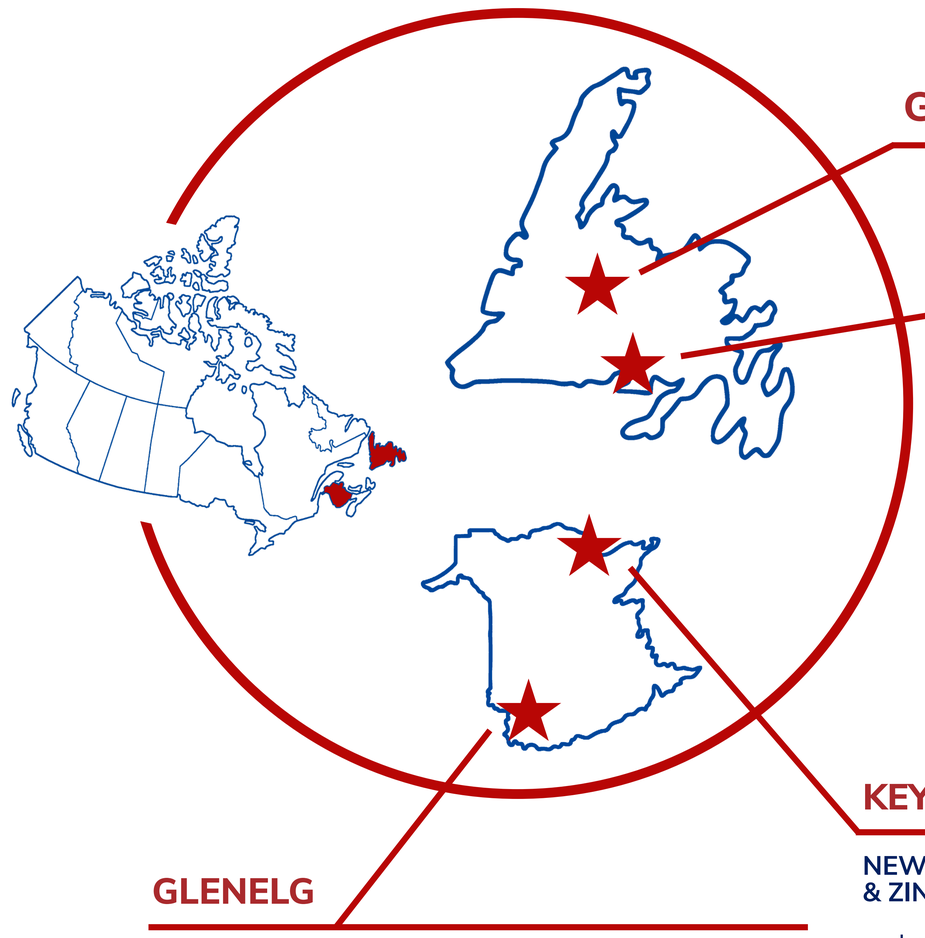
Experienced Leadership & Strong Ownership Structure

(Sep 2026)



Share Price	$0.06
Shares Issued & Outstanding	69,949,126
Warrants	23,248,751 @ $0.09
Options	1,200,000 @ $0.15
Market Capitalization	$4.2 million

Key Properties (100% Owned)



GOLDEN PROMISE

FLAGSHIP PROPERTY

SOUTH QUARRY

NEWFOUNDLAND | TUNGSTEN | 6,300 ACRES

- Located in east-central Newfoundland (Exploits subzone)
- Emerald studies to be conducted at sites of green beryl crystals
- High grade tungsten in pegmatitic veins / dykes with grab samples exceeding 5% WO3 (SQZ)
- Historic 1985 drill hole at SQZ intersected 2.77% W03 over 0.9m in altered limestone (indicating skarn potential)

KEYMET SILVER MINE

NEW BRUNSWICK | GOLD, SILVER, COPPER & ZINC | 8,253 ACRES

- Located on the edge of the historic Bathurst camp
- High grade silver, copper and zinc vein systems with focus on Elmtree 12 vein system and adjacent gold bearing bedrock and float
- 2018 drill results: 9.0% zinc, 9.1% copper, and 1,158 g/t silver over 3.00m (core length)
- 2021-2023 work identified an approx. 1.5 km long target trend with zones of anomalous gold in soil and rock samples
- Base metal - Silver production ceased in 1950s due to fire (Keymet Mine)

GLENELG

NEW BRUNSWICK | VANADIUM, ANTIMONY & GOLD | 8,650 ACRES

- 13.7 - 23.4% antimony in three 2022-2023 samples from quartz-stibnite vein (2022 discovery)
- 0.50 g/t gold in bedrock grab sample (2023 discovery)
- Up to 0.188% vanadium (0.33% V2O5) in 2018 bedrock grab sample
- Adjacent to the Clarence Stream Project of Galway Metals Inc.
